# ABOUT FACTORY

We manage an integrated marble factory

Our company operates an integrated marble factory in the Elaziğ Organized Industrial Zone, equipped with the latest technology, where we process block marbles sourced from our own MOCA quarry in Elaziğ.

We have earned the trust of customers hailing from 12 different countries, showcasing our international reputation. Our global clientele reflects our commitment to quality and reliability.

# ABOUT PRODUCTS

Our products can be used in every place and environment.  
Our product has been used in the construction industry for a long time.

# Moca Cream

Due to its enduring durability and glossy finish, Moca cream finds applicability in various settings and conditions, making it a longstanding choice within the construction industry.

## Moca Gray

Moca Gray, sourced from the same quarry as Moca Cream, features a versatile structure suitable for both interior and exterior use. This shared origin and adaptability make it a versatile choice for various applications.

## Moca Gray Porous

Moca Gray Porous undergoes unique processing techniques, which give it an anti-slip structure. This distinctive feature makes it particularly suitable for use in both flooring and pool areas.
